microprocessor 8085 multiple choice questions with answers ...

Microprocessor 8085 is one kind of processor developed by Intel. The number 5 specifies that it uses +5V power supply. It has 40 pins and uses multiplexed address. It works like a controller and has long life. All computers use the microprocessor 8085. Even tabs, laptops and other gadgets use this. Good knowledge on microprocessors is required for this job. Below are the Microprocessor 8085 interview questions and answers which makes you comfortable to face the interviews:
