Creating a Line Plot with Whole Numbers | Line Plots

Create a horizontal line. Check out your data and see what your largest and smallest data is. Your smallest number is 0 and your largest is 8, so you will have to draw a horizontal line that spans from 0 to 8. If you're working with a larger range of numbers, then you won't have to label every single number.

3rd Grade Graphing & Data Worksheets & Free Printables ...

Guide students in collecting the data and creating the line plot. Ask questions that get them talking about their process. Intermediate. Allow students to work with a supportive peer or a student with the same L1, if possible. Give students a sentence stem to assist them in their discussion, such as: The line plot is telling me...

Line Plots - Fractions (4th grade, examples, solutions ...

In Fourth Grade, students created line plots and use them to solve real world problems that involved addition and subtraction of fractions. Now, in Grade 5, 5.MD.2 requires the focus to shift to real world problems involving all operations with fractions. It is important for students to understand that the line plot must be divided into equal intervals and must include the entire range of the data set.
