### **3 International Week on Risk Analysis, Dam Safety, Dam ...**

Since August 14, 1929, the State of California has regulated dams to prevent failure, safeguard life, and protect property. The California Water Code entrusts dam safety regulatory power to DWR, Division of Safety of Dams (DSOD). We provide oversight to the design, construction, and maintenance of over 1,200 jurisdictional sized dams in California.. We ensure dam safety by:

construction, and operation of new dams and in the safety evaluation of existing dams. As early as 1929, following the failure of the St. Francis Dam, the State of California enacted a dam safety program. Subsequently, other dam failures causing loss of life and property have prompted additional legislation on state and national levels.

### **(PDF) Portfolio Risk Assessment: A Tool For Dam Safety ...**

[image\_assist|fid:4317,style:left,nid:2248]Dam safety is a huge global concern. While individual dams built today are likely to be much more secure than those built 50 years ago, the global stock of dams as a whole is ageing. Around the world, 5,000 large dams are at least 50 years old; the average US dam is in its 40s. These older dams are highly prone to dam bursts,

### **Dam safety evaluation : 2nd international conference ...**

The risk of failure is higher in dams that are poorly planned, designed, constructed, and inadequately operated and maintained. ICOLD does not only deal with technical aspects related to the design and safety of large dams but is also concerned with dams of all sizes and purposes – including small dams, mine tailings, dykes and levees.

### **Division of Safety of Dams - California Department of ...**

Dams with owners who do not have an effective ODSP represent a higher risk. The owner's dam safety program has been cited as a contributing factor in many dam failures including: the 1976 failure of Teton Dam, the 1986 failure of Upriver Dam, the 2003 failure of Silver Lake Dam, and the 2005 failure of Taum Sauk Dam
