Disease~~

Digestive system

Crohn's disease and  
ulcerative colitis are  
both forms of

inflammatory bowel  
disease. Crohn's  
disease most  
commonly affects the  
colon and the last part  
of the small intestine  
(ileum). Ulcerative  
colitis affects the colon.

~~Inflammatory Bowel  
Disease: Endoscopic...~~

Treatment. The goal of  
inflammatory bowel  
disease treatment is to  
reduce the

inflammation that  
triggers your signs and  
symptoms. In the best  
cases, this may lead  
not only to symptom  
relief but also to long-  
term remission and  
reduced risks of  
complications.
