Extra Heart Sounds. Extra heart sounds are the sounds other than the normal S1 and S2. These are the third and fourth heart sounds. Third Heart Sound (S3) -Ventricular gallop. In normal circumstances, diastole is a silent event. However, in some conditions ventricular filling causes some vibrations to be heard over the chest wall.

Heart Sounds: Normal and Abnormal Heart sounds | Medcrine

Heart Sounds . The audible sounds that can be heard from the heart are made by the closing of the heart valves. These sounds are referred to as the "lub-dupp" sounds. The "lub" sound is made by the contraction of the ventricles and the closing of the atrioventricular valves. The "dupp" sound is made by the semilunar valves closing.

Professional Skill Builder | Heart Sound & Murmur Library

Remember high-pitched sounds are heard with the diaphragm of the stethoscope, whereas low-pitched sounds are heard with the bell. Left lateral decubitus position brings the left ventricle close to the chest wall which accentuates or brings out a left-side S3 and S4 an mitral murmurs.

Murmurs Made Easy | Epomedicine

Heart murmurs are sounds — such as whooshing or swishing — made by turbulent blood in or near your heart. Your doctor can hear these sounds with a stethoscope. A normal heartbeat makes two sounds like "lubb-dupp" (sometimes described as "lub-DUP") when your heart valves are closing.

Heart murmurs - Symptoms and causes - Mayo Clinic

The heart, but made incredibly easy. The heart is a hollow, muscular organ about the size of a closed fist. Located between the lungs in the mediastinum, it's about 12.5 cm (5") long and 9 cm (3½") in diameter at its widest point.

The heart: made incredibly easy | Nursing Times

The first sound you hear in the cardiac cycle is the "lub", and it is a sound full of meaning. "Lub" means that the heart is in systole, or the ejection phase of the heart. It is the sound of the mitral and tricuspid valves closing as the body empties the ventricles into the lungs (see Important Lung Sounds Made Easy) and body.
