### Helium

Helium is the second lightest and second most abundant element in the observable universe (hydrogen is the lightest and most abundant). It is present at about 24% of the total elemental mass, which is more than 12 times the mass of all the heavier elements combined. Its abundance is similar to this in both the Sun and in Jupiter.

### Acton Helium Tanks - Local Helium Balloon Shops, Helium ...

Built from the ground up, the Helium blockchain powers the network and serves as the underlying technology for Helium tokens. The blockchain acts as a 'cryptographic notary' since transaction data from devices including connectivity time, and the location is added to the blockchain and is immutable, inspectable, and censor-resistant.
