A person who has

# Read Free Herpes Herpes Cure The Natural Herpes

herpes usually develops blisters and lesions in the affected area, which can be either in the mouth or genital area of the person. One fact that is devastating about herpes is that it is not curable; however, the virus can be successfully controlled if you know the kinds of food to avoid if you have herpes.

herpes research thus far involves only HSV-1, but the scientists are now working on ways to extend their success to HSV-2. The first step will be to repeat their experiments using HSV-2 in guinea pigs, which, unlike mice, experience natural reactivations of herpes virus infections, just as humans do.
