The result is a complete approach to trading that will allow you to trade confidently in a variety of markets and time frames.

High Probability Day Trading Strategies - Forex Trading Tips

When I started out trading I was under the impression that the more difficult trading methods would produce bigger winners or higher probability of winning trades. I purchased several books and magazines that discussed Gann Lines, Geometric calculations and Elliot Wave Principles that required a PhD in physics to understand correctly.

High Probability Day Trading Chart Patterns To Watch

High probability trading setups are price action trading setups that could possibly be defined as having a high probability “positive trading expectancy.” Trading expectancy is the average amount you can expect to win (or lose) per trade with your system, when a large number of trades are taken.

High Probability ETF Trading: 3-Day High/Low Method ...

High probability trading refers to the likelihood of whether a trade will win or not. Making high probability trades is crucial for a successful trader because no matter how great the trader is, they will have losing trades. This is a fact. The market will move in unexpected ways and losses will happen.

High Probability ETF Trading: 3-Day High/Low Method ...

Popular amongst trading strategies for beginners, this strategy revolves around acting on news sources and identifying substantial trending moves with the support of high volume. There is always at least one stock that moves around 20-30% each day, so there's ample opportunity.
