use a lot of hobby supplies (glue, spray paints, epoxy, etc.), good air circulation can help dissipate odors and fumes.

Ducted Air Circulation | HEG : Home Efficiency Group

Move air up or down. A ventilator fan can move existing cool air from one level or room to another through the wall or floor. If you have a hot room in an otherwise comfortable house, you can pump existing cool air into that hot room using a special fan installed in the wall or floor.

Ventilation Systems, Heat Pumps | HRV New Zealand

The air ducts carry the return air to your system for treatment and cooling. If there's a rip in the ducts, the cool air will escape inside your walls, which is not beneficial to your residents' comfort or wallet. Leaky air ducts can make the entire home warmer, which will make your system work harder and increase your electric bills.
