Semantic Web - VLDB

The revised papers presented in this book are drawn from two meetings devoted to the Semantic Web and the legal domain: The International Workshop on Legal Ontologies and Web-Based Legal Information Management held in Edinburgh, UK in June 2003, and the International Seminar on Law and the Semantic Web, held in Barcelona, Spain in November 2003.

Law and the Semantic Web - Slaw

The Semantic Web is an extension of the World Wide Web through standards set by the World Wide Web Consortium (W3C). The goal of the Semantic Web is to make Internet data machine-readable. To enable the encoding of semantics with the data, technologies such as Resource Description Framework (RDF) and Web Ontology Language (OWL) are used. These technologies are used to formally represent metadata.

A Semantic Web Framework for Laws - Infonomics Society

lected for this special issue of the Semantic Web for the Legal Domain. 2. Semantic Web, industry, and free access to law: Publishers meet semantics According to the vision provided in foundational works [35,95,109,111], Semantic Publishing is the use of Semantic Web technologies to enhance published documents (e.g., journal articles) in order ...

Law, Ontologies and the Semantic Web - How is Law ...

"Legal Theory, Sources of Law and the Semantic Web" is an attempt to construct an integrated conceptual framework for the application-neutral and problem-neutral representation of sources of law using Semantic Web technology and concepts and some technically straightforward extensions to Semantic Web technology based on established practices found in fielded applications.
