Summary bar. The bar at the bottom of Network panel summarizes the total number of HTTP network errors, requests, data transferred, and load times during the network profiling session (i.e., since DevTools were opened and recording network traffic).. Elapsed time means the time between the start of the profiling session and when the last resource was downloaded from the network.

~~Network Documentation Tools File Type~~

SYDI - Network Documentation Server. Basically, the admin runs the SYDI script which collect network data. It then saves that data to an XML file or Word document. While the SYDI Server script is the most developed package, other scripts are available for collecting data on Exchange, SQL, and SMS servers.

~~Network documentation—Wikipedia~~

One big problem I still have is network documentation. We use many tools to document our client networks. Some work OK. Some are very cumbersome to use. It is very hard to get techs to document their work and changes. It's even harder when they have 20 different tools to use and they do not know how/can't remember how to use all of them.

~~How to tackle a network documentation project—TechRepublic~~

Network documentation. Jump to navigation Jump to search. Network documentation is a form of technical documentation. It is the practice of maintaining records about networks of computers. The documentation is used to give administrators information about how the network should look, perform and where to troubleshoot problems as they occur.

~~Create network documentation template~~

Flexible Licensing. netTerrain Logical is licensed per # of devices, and # of editors (read-only users are unlimited). Permanent license option: pay once, install the software in your premises, keep it forever. Subsequent yearly maintenance is optional. Yearly license: install the software in your premises and pay once a year.
