*(PDF) Effect of Population Growth on Economic Development ...*  
The developing countries are faced with several contradictions 'n regard to population growth and economic and social development. For example, the birth rate has largely been static from 1900 to 1970, and the death rate has declined considerably because of the development in scientific and economic fields.

*Population Growth and Economic Development: A Close View*  
Population Growth and Economic Development of a Country! When population grows faster than GNP, the standard of living of the people does not improve. In fact rapid population growth has been obstructing economic growth in developing countries like India where since 1951 population has been growing at a relatively high rate.

*The Effects of Population Growth on Economic Development ...*  
The relationship between population growth and economic development has been a recurrent theme in economic analysis since at least 1798 when Thomas Malthus famously argued that population growth would depress living standards in the long run. The theory was simple: given that there is a fixed quantity of land, population growth will eventually ...
