Pseudorabies..
Pseudorabies, PRV, Aujeszky's disease, infectious bulbar paralysis or 'mad itch', is caused by a virus with icosahedral symmetry and belongs to the subfamily Alphaherpesvirinae within the family Herpesviridae.

Aujeszky's Disease «
CFSPH

Aujeszky's disease (pseudorabies) is a

Aujeszky's disease,
usually called
pseudorabies in the
United States, is a viral
disease in swine that
has been endemic in
most parts of the
world. It is caused by
Suid herpesvirus 1.

Access Free Pseudorabies

Aujeszky's disease is considered to be the most economically important viral disease of swine in areas where classical swine fever has been eradicated. Other mammals, such as cattle, sheep, goats, cats, dogs, and raccoons, are also susceptible. The disease is usually fatal in these animal species. The term "pseudor
