From the Publisher: . Communication Satellite Systems Engineering can be divided into several widely disparate fields - 1) the design of the communications transponder, 2) the space platform around to carry it, 3) a launch system for placing it into orbit, 4) the earth stations for communicating and, 5) the interconnection lines with terrestrial systems.

-We just saw in the previous episode that a satellite communications system involves the collaboration of numerous devices. Devices with different features. On one side there are terminals, some of which look like mobile phones with small antennas and batteries, on the other side there are, for example, gateways, connected to the classic power grid of course, with large antennas.
