~~What is Facilities Management?~~

Service quality (SQ), in its contemporary conceptualisation, is a comparison of perceived expectations (E) of a service with perceived performance (P), giving rise to the equation $SQ=P-E$. This conceptualisation of service quality has its origins in the expectancy-disconfirmation paradigm.

~~A facility manager's role to provide quality service ...~~

Training of service employees has long been identified as the most important factor behind higher service quality. For years, studies have proved that there is a strong correlation between the number of employee training hours and the degree of service quality. To make it a success, the employer should focus on more than the basic service-specific competencies. The main emphasis should rather be on training of service management and other soft skills such as social skills, attitude and ...
