Social Lity Among Scheduled

I assume that competition for resources takes place among the total population of all sharing groups. Accordingly, in the simulation, an individual's baseline production as shown in Fig. 1 varies inversely with population size. I assume that higher consumption in childhood (age 0–4) raises an individual's adult productivity, perhaps by increasing body size or cognitive function, with 10% ...

Sociality, Hierarchy, Health: Comparative Biodemography is a collection of papers that examine cross-species comparisons of social environments with a focus on social behaviors along with social hierarchies and connections, to examine their effects on health, longevity, and life histories. This report covers a broad spectrum from humans to nonhuman animals, exploring a variety of measures of ...

Sociality, Hierarchy, Health: Comparative Biodemography ...

In an introductory article to the feature, Sarah Brosnan, a behavioral psychologist at Georgia State University, and Erik Postma, an evolutionary biologist from the University of Exeter, write about this conundrum, and the disconnect they see among their “human” colleagues who primarily study human biology and behavior and “non-human” colleagues who study other animals.

Yet most of the evidence on the health of Scheduled Tribes is available either at the aggregated level, failing to account for the diversity among Scheduled Tribe groups, or focuses on the health ...

Land Distribution among Scheduled Castes and Tribes ...

H. nigrinervis was thought to be the only allodapine that was not social, and our findings therefore indicate that there have been no losses of sociality among extant allodapine clades. Allodapine colony sizes rarely exceed 10 females per nest and all females in virtually all species are capable of nesting and reproducing independently, so these bees clearly do not fit the 'point of no return ...

Social complexity in bees is not sufficient to explain ...

In fact, expanding the scope of what counts as infrastructural has been a feature of work on infrastructure within the social sciences. There is work on infrastructures of public health (Baker et al., 2005), education (Lo, Preston, Anisef, Basu, & Wang, 2015; Vincent, 2006), and even democracy (von Schnitzler, 2016).The concept of social infrastructure is part of this extension.
