Split Systems (Air Conditioner) - FUJITSU GENERAL

Traditional central air conditioning is not always the best fit for every home. If you have an older home, installing whole-home air conditioning may not be possible due to lack of space for ductwork. Fortunately, there's a popular, flexible solution: ductless heating and cooling units, known as ductless mini split air conditioners.

Split Airconditioner Control Troubleshooting Guide

A split air conditioner consists of an outdoor unit and an indoor unit. The outdoor unit is installed on or near the exterior wall of the room that you wish to cool. This unit houses the compressor, condenser coil and the expansion coil or capillary tubing.

Split/Multi-Split Type Air Conditioners - Daikin

Split type air conditioners are named as such because they split the components of a traditional air conditioning system into two individual units - one indoor and one outdoor. The outdoor unit houses the compressor and condenser components, while the indoor unit contains the distribution and filter components.

the indoor/outdoor unit, wetting and damaging the furniture. In case of an abnormal condition Immediately stop operating the air conditioner and consult your dealer. Replace all batteries of the remote controller with new ones of the same type. • Using an old battery together with a new one may cause overheating, leakage, or explosion.

LG Split Type Air Conditioners: Active Energy Control | LG ...

A split air conditioner is also commonly known as ductless split or mini split where there is an outdoor unit and an indoor unit. The outdoor unit consists of a compressor, a fan and the condenser. This is the place where heat from the indoor is transferred from the indoor to the outdoor and is rejected to the surrounding.

Split-System Air Conditioners | Amazon.com

Compressor: The size of the compressor varies depending on the desired air conditioning load. In most of the domestic split air conditioners hermetically sealed type of compressor is used. In such compressors the motor used for driving the shaft is located inside the sealed unit and it is not visible externally.

Parts of Split Air Condioners: Outdoor Unit

The indoor unit of the split air conditioner is a box type housing in which all the important parts of the air conditioner are enclosed. The most common type of the indoor unit is the wall mounted type though other types like ceiling mounted and floor mounted are also used.
